

## Spectral eLearning Course Access

To: {Insert Manager's Name},

I would like to access the Spectral eLearning courses created by L3Harris. These courses provide the in-depth knowledge necessary to accurately utilize spectral data sets. Taking the courses will help me make a more meaningful impact within our organization. The courses provide instruction on the fundamentals of spectral processing and analysis, and with self-guided hands-on exercises completed via ENVI® software, provide a concrete learning experience. In addition, comprehensive evaluations at the end of each course test for knowledge and reinforce the concepts that were presented.

The courses include:

- Introduction to Spectral Interpretation
- Understanding Image Quality
- Evaluating Area of Interest Coverage
- Spectral Data Applications
- Image Classification Overview
- Introduction to Hyperspectral Analysis
- Understanding Atmospheric Effects
- Change Detection & Time Series Overview
- Identifying Data Resources
- Working with Non-Spectral Data

Each interactive course is comprised of approximately three hours of learning, priced at \$250 individually, or can be bought as a bundle for \$2,025. Individual courses will grant me access to the industry-standard software for spectral analysis, ENVI, for 30 days, and buying the 10 course bundle grants access for 60 days.

Thank you for considering my request. I hope you'll agree that taking these courses would be extremely worthwhile and positively impact our organization. You can find further details on the Spectral eLearning courses at [www.L3HarrisGeospatial.com/eLearning](http://www.L3HarrisGeospatial.com/eLearning).

Sincerely,

{Your Name}
